Coronado Stone has been the leading innovator in the manufactured stone industry for over fifty years. We have replicated some of the most sought after natural stone varieties in the world and we continue to add new products year after year. We are dedicated to offering an extensive product line with unique textures and colors that can be used to enhance any architectural style.

Our manufactured stone is engineered to be both realistic and efficient. We use time-tested craftsmanship to imitate the look and feel of natural stone. We also engineer the shapes and sizes of our profiles to minimize installation time and maximize the stone's inherent beauty. Each of our stone profiles feature a unique blend of textures and colors that mimic the distinct characteristics of the native stones they replicate.

3" Split Limestone - *Genoa Sands*

Osage - *Ancient Reef*

Montana Ledge - *Chablis*

Osage - *Fossil Bay*

Yukon Rubble - *Black Rundle*

## VILLA STONE SERIES

We searched up and down the Mediterranean coast to find the perfect blend of stone shapes and textures that embodied European old world architecture. Our Villa Stone profiles exemplify the unique characteristics of some of the most sought after types of stone adorning villas and chateaus across Europe.

## *FLOOR TILE SERIES*

We have gathered some of the most unique flooring textures from around the world to create a beautiful collection of cement-set concrete tiles. Using a specialized method for color blending, the finished product is virtually indistinguishable from natural stone tile.

*Jerusalem Cobble - Antique Sands*  
*Mountain Strip Stone - Fawn*  
*Elephant Ear Wall Cap - Fawn*

# VERSAILLES TRAVERTINE

Versailles Travertine adds a beauty to your home that inspires absolute refinement. From its soft hues to its distinct tumbled textures, Versailles Travertine defines elegance.

Versailles Travertine - *Wheatfield*

Italian Tile - *Saltillo*

# ITALIAN TILE

Italian Tile adds a sense of tradition, warmth and old world charm that other tiles don't possess. This faintly textured tile, coupled with its hard-lined edge, creates a feel of natural symmetry.

*Mission Red*

*Buckskin*

*Cayenne*

# JERUSALEM COBBLE

Jerusalem Cobble brings the ancient world to your footsteps. Replicating the old cobble roads of Jerusalem with highly detailed textures and rustic earth tone colors, Jerusalem Cobble adds an old world feel to any setting.

Jerusalem Cobble - *Antique Sands*

Mexican Tile - *Milano*

# MEXICAN TILE

Our Mexican Tile is popular throughout the Southwest due to its genuine look and feel. This tile is for those seeking the authentic beauty and style of a Spanish Hacienda.

*Saltillo*

*Burnt Orange*

*Heritage Blend*

# BELGIAN TILE

It is the beauty of Belgian Tile that gives it so much charm. This attractive tile can be used in several different indoor and outdoor settings.

*Antique Buff*

*Rustic Brown*

*Belgian Tile - Autumn Leaves*

*River Washed Tile - Desert Rust*

# RIVER WASHED TILE

River Washed Tile exudes a sense of tranquility. This lightly textured stone mimics natural color blends and works perfectly with indoor and outdoor mosaics.

*Desert Rust*

*Grey Granite*

# RANDOM FLAGSTONE TILE

Random Flagstone has a timeless beauty. This uniquely shaped tile will match almost any architecture and stone veneer. In addition, the shape makes it extremely easy to install.

*Dakota Brown*

*Brookside*

*Grey*

*Random Flagstone Tile - Riviera Blend*

*European Cobble - Alpine Blend*

# EUROPEAN COBBLE

European Cobble radiates the charm and ambience of Europe with an array of old world colors. This profile adds the authentic touch and feel of an ancient cobble stone street.

*Alpine Blend*

*Monaco Blend*

Coronado Stone is manufactured to meet or exceed specifications for all major code approvals. Independent testing confirms compliance with ICC-ES AC51 for Precast Stone Veneer. Always check your local building codes before installing stone.

### Materials:

- Cement ASTM C150
- Sand ASTM C144 or C33
- Aggregate ASTM C33 or C330

### Testing:

- Shear Bond Test Tested in accordance with ASTM C482 Greater than 50 psi
- Water Absorption Tested in accordance with section 3.1.4 & 4.6 of ICC-ES AC51
- Freeze / Thaw Tested in accordance with ASTM C67 Less than 3% mass loss
- Unit Weight Shipping weight is less than 15 lbs. per sq. ft. Density is determined in accordance with ASTM C567
- Compressive Strength Tested in accordance with ASTM C39 Greater than 1800 psi
- Tensile Strength Tested in accordance with ASTM C190
- Flexural Strength Tested in accordance with ASTM C348

**Weight:** The average packaged weight of Coronado Stone veneer is 8 to 12 lbs. per square foot. Weight varies with thickness.

**Non-combustible:** Testing on Coronado Stone showed zero flame spread and zero smoke development.

**Integral Colors:** Coronado's production process results in a product which maintains a natural stone appearance even after many years of exposure to the elements.

**Approvals:** Coronado Stone has been tested by independent laboratories and has been approved for its intended use by:

 **ICC The International Conference of Building Officials. Report ESR-2598**

## 50 YEAR LIMITED WARRANTY

Coronado Stone Products' wall veneers are protected under this warranty for a period of 50 years from the date purchased, when used on a vertical structure which conforms to local building codes and when installed in accordance with the manufacturer's instructions. Warranty coverage specifically excludes damage resulting from structure settlement and other types of wall movement; contact with paint or chemicals; discoloration due to contaminants; staining, oxidation and water damage.

This warranty covers only manufacturing defects in Coronado Stone Products' wall veneers and is limited to the replacement or repair of defective materials only and does not cover the cost of removal or installation of defective products. This warranty is limited to the original purchaser and is non-transferable to any subsequent owner.

Coronado Stone Products is dedicated to producing a superior manufactured stone veneer with the least amount of impact to our environment. With a combination of internal recycling techniques, products that increase levels of energy performance and 6 strategically placed facilities throughout the U.S. and Canada, Coronado Stone can help you achieve sustainable solutions for LEED requirements.

LEED Credit Category	LEED Points	Intent	Requirements	Coronado Contribution
EA Credit:1 <b>Energy &amp; Atmosphere:</b> Optimize Energy Performance	2-10	Achieve increasing levels of energy performance above the prerequisite standard to reduce environmental impact associated with excessive energy use.	Demonstrate a percentage improvement in the proposed building performance rating compared to the baseline building performance rating per ASHRAE/IESNA Standard 90.1—2004	Coronado Stone Veneer products can add to the building energy efficiency of exterior walls. Overall efficiency contribution depends on architectural design.
MR Credit:4.1 or 4.2 <b>Materials &amp; Resources:</b> Recycled Content: 10% or Recycled Content: 20%	1-2	Increase demand for building products that incorporate recycled content materials, therefore reducing the impact resulting from extraction and processing of virgin materials.	Use materials with recycled content, such that the sum of post-consumer recycled content plus one-half of the pre-consumer content constitutes at least 20% (based on cost) of the total value of the materials in the project.	Coronado Stone Veneer products can contribute to a project's overall recycled content. Recycled material is used in the production of Coronado's stone veneer which may vary between facilities.
MR Credit:5.1 or 5.2 <b>Materials &amp; Resources:</b> Regional Materials: 10% or Regional Materials: 20%	1-2	Increase demand for building materials and products that are extracted and manufactured within the region, thereby supporting the use of indigenous resources and reducing the environmental impact resulting from transportation.	Use building materials or products that have been extracted, harvested or recovered, as well as manufactured within 500 miles of the project site for a minimum of 20% (based on cost) of the total materials value.	Coronado Stone has 6 strategically placed manufacturing facilities located in the U.S. & Canada which can provide a contribution to this category. (view map on page 84)

Coronado Stone Products is Proud to be a Member of the U.S. Green Building Council.

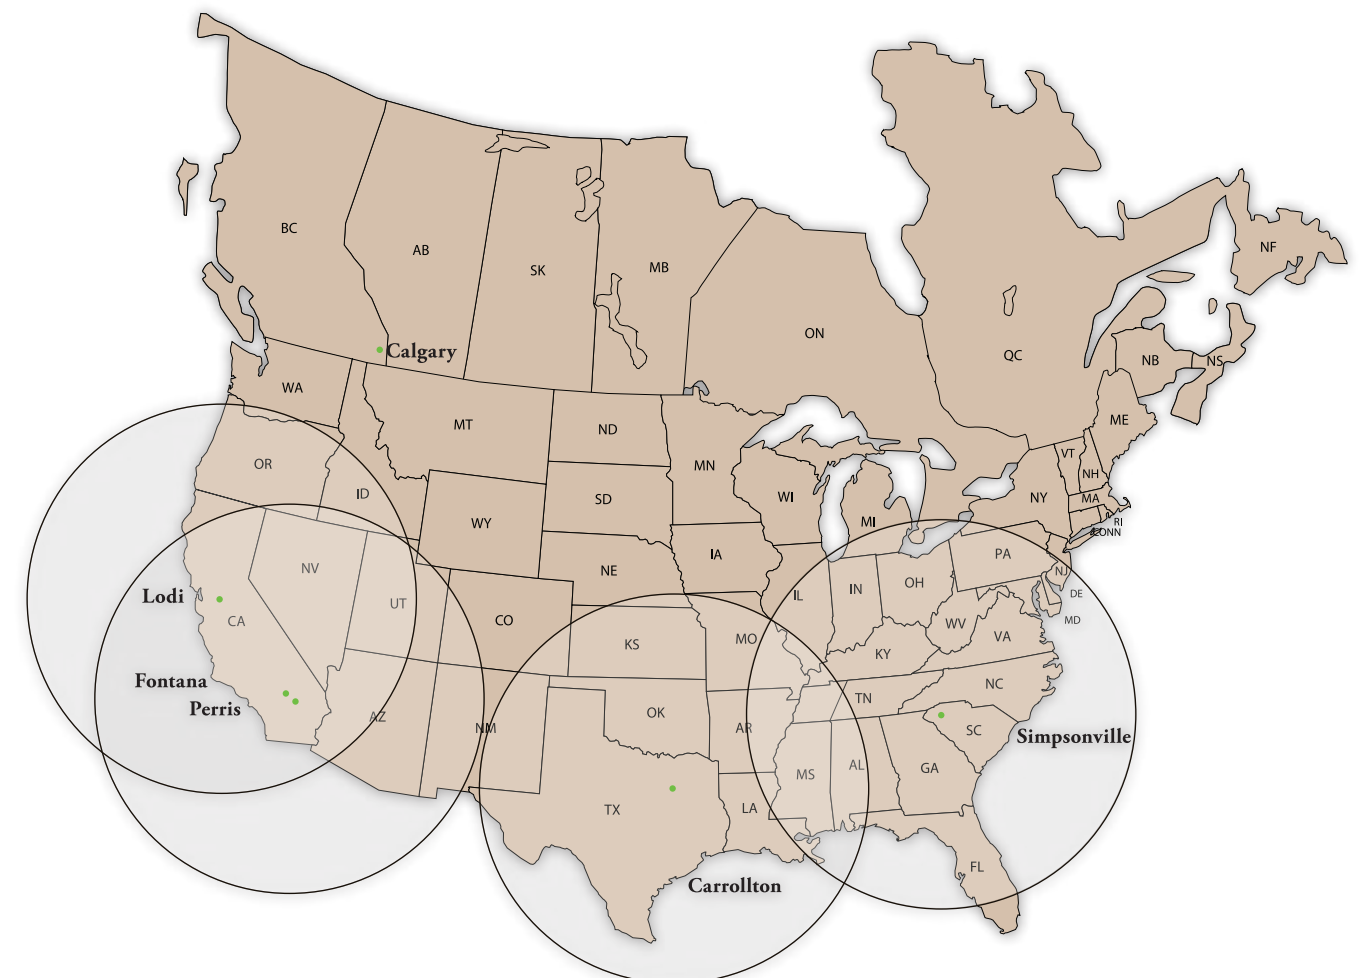

In 1960, there was only one stone manufactured in California. It was a 2½' x 4' sheet of concrete which was broken up into random shapes at the job site. Mel Bacon saw the need for something better and started making his own stone. He soon developed the first random shaped stones from individual molds which led to the development of many of today's popular varieties of ledge stones and ashlar patterns.

As a mason, Mel experienced the difficulty of installing stone that was not created with the installer in mind. It was heavy and the shapes and sizes were difficult to piece together. He realized that through proper pattern and mold design, ease of installation could be achieved. From that moment, ease of installation became the benchmark for every pattern of stone Mel created. Easy installation is not only a time saver, it's a project saver.

The pride we take in the creation of our product shows in the quality experience you will enjoy as one of our valued customers. Give Coronado the opportunity to make you a believer. Our mission is your satisfaction!

## OVER 50 YEARS OF MANUFACTURING EXCELLENCE

Coronado manufactures and distributes its high quality stone at five factories conveniently located across North America

Circles above indicate 500 mile radius for LEED requirements.

Western Region serviced by the Fontana, Perris and Lodi factories  
**(800) 847-8663**

Western Canada Region serviced by the Calgary factory  
**(403) 203-0881**

Central Region serviced by the Carrollton factory  
**(888) 567-2833**

Eastern Region serviced by the Simpsonville factory  
**(864) 962-1221**
